

CLIMATE CONSERVANCY CHAPTERS PROGRAM

Global Grassroots Action for Climate Justice

108 Active Chapters | 67 Countries Represented

Climate Conservancy Chapters Program empowers student-led grassroots movements across the globe. With a presence in over 67 countries, our 108 chapters are driving localized, community-based climate action while contributing to a global strategy for environmental resilience, equity, and education.

Educate and Mobilize

Chapters are the heartbeat of our mission. Students initiate and lead efforts in climate conservation through educational workshops, youth mobilization, and community organizing. Each chapter receives curated resources, mentorship, and strategic guidance to ensure their work is not only meaningful but measurable.

Registration and Onboarding

Prospective chapter leaders apply through a streamlined process. They affiliate with a school or local community organization and gain immediate access to our global network, expert-curated learning materials, and continuous support. Every chapter becomes a conduit for climate leadership and local impact.

Tangible Impact, Global Reach

From disaster preparedness and recovery to climate policy advocacy, our chapters are catalysts for transformation. They spearhead initiatives in climate education, creative expression, civic leadership, and community-driven sustainability. Their work bridges grassroots action with global urgency.

Prioritizing Equity and Access

Our model centers the Global Majority: we elevate underrepresented voices, remove systemic barriers, and ensure that climate literacy translates into action in communities most affected by climate change. By redistributing access to high-quality environmental education, we foster equity through knowledge and leadership.

GLOBAL CLIMATE RESOURCE HUB

All chapters receive access to an exclusive, continually updated library of resources, including:

- Native and Invasive Species Literacy
- Ocean Literacy and Marine Ecosystem Education
- Climate Policy and Science Briefs
- Regionally Specific Conservation Data

LEADERSHIP AND SKILLS DEVELOPMENT

Chapter leaders gain real-world experience in essential skills, preparing them to become the next generation of environmental leaders:

- Strategic Leadership
- Community Organizing
- Public Speaking and Communication
- Ethical Fundraising and Partnership Building

CUSTOMIZABLE PROGRAMMING THEMES

Chapters design their own focus areas, aligned with regional needs and personal passions. Popular program themes include:

- *Ground Guardian*: An Invasive Species Restoration Project
- Biodiversity Conservation Literacy
- Climate Book Clubs and Reading Circles
- Localized Environmental Education Initiatives
- Youth in Climate Leadership and Advocacy
- University and School-Based Climate Workshops
- Citizen Science for Data Collection and Research
- Flora and Fauna Identification and Preservation
